

Metalearn is a pioneer in the business of developing e-learning solutions. The company offers end to end solutions in the e-learning space – offering both e-learning products as well as custom development of e-learning solutions. In addition, it offers content (courseware) creation as well as consulting services for companies looking to deploy e-learning solutions. The solutions target both enterprises as well as educational institutions wishing to offer on-line education programs.

## Featured products

The Learning Management System Adventus ver 2.0 is an e-learning platform that aids Corporations and Institutions incorporate a comprehensive learning system in their training and education programs. It has been designed to perform on the Web across bandwidth types.

The product is built on three-tier architecture with a database layer, business layer and presentation layer that is highly scalable and flexible.

Learning Management System Adventus ver 2.0 is a broad based macro system that integrates enterprise-wide resources and caters to microlearning needs. It can deliver any content in any form enterprise-wide and across learning communities. The platform can also “play” any electronic course - web based or not - and architecturally extends itself to all other enterprise wide people management systems.

Key functionality of the platform includes features for faculty and administrators to build courseware and schedule enrollments, publish course catalogs and carry out assessments. Learning Management System Adventus ver 2.0 also offers a sophisticated, user-friendly course creation module which allows users to create courses from simple to complex hierarchical course structures. This functionality enables users to create courses and reuse content from other courses rapidly.

## Success story

US-based Educo International Inc. needed a software platform that could deliver math and science content online. The company chose Learning Management System Adventus ver 2.0 based on technology, time to market, quality and cost criteria and successfully launched its services for colleges in the United States, India and Puerto Rico. The customer structured their business model around the launch of this application and is scaling their business, again on Learning Management System Adventus ver 2.0, based on the success of the platform.

## Customer Quote

“As a math and science content provider, we were looking for a software technology to deliver math and science content online..... We successfully launched the product in United States, India and Puerto Rico for College segment and we have additional plans to role out derivative products for k-12 market segment. This success was made possible because of the capability, professionalism and commitment from every member of Metalearn’s team. Educo will continue to work with Metalearn to exploit the latest technology for delivering online content to the masses” - **Aman Bhardwaj, VP, Operations, Educo International**

*“We are building continuous and sustainable access, availability and affordability of learning for all, through innovative products and engagements”*

## Blazing the innovation trail

By offering a comprehensive platform in its chosen area of e-learning, Metalearn has created demonstrable value for its customers.
